

Wired, weekly, digital thermostat with WiFi, flush-mounted

AURATON Octa is a modern, flush-mounted wired thermostat featuring a high-resolution TFT IPS color display. It stands out with its sleek design and advanced functionality. AURATON Octa offers weekly programming, holiday mode, parental lock, and overheat protection. It supports both heating and cooling modes.

Once connected to a Wi-Fi network, the thermostat displays the current time, date, day of the week, as well as outdoor temperature and humidity. It also provides localized weather conditions, air quality, and PM 2.5 particle levels.

The thermostat is compatible with the Smart Life and Tuya mobile apps, allowing convenient heating control from a smartphone or tablet.

AURATON Octa is a smart solution that combines modern design, user-friendly control, and full temperature management for your home.

- 

Air temperature sensor + floor temperature sensor (3 configuration options)
- 

Works with Tuya
- 

6 independent temperature settings per day + manual + holiday mode
- 

Minute-level temperature setting precision
- 

FrostGuard function – prevents the system from freezing
- 

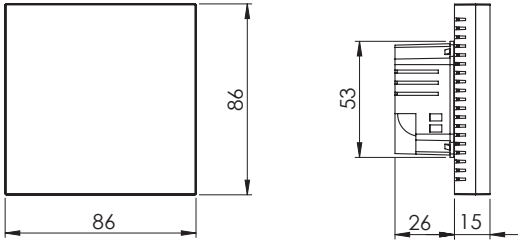

Up to 14 temperature programs
- 

Holiday mode – set an independent temperature for up to 30 days
- 

Heating or cooling operating mode
- 

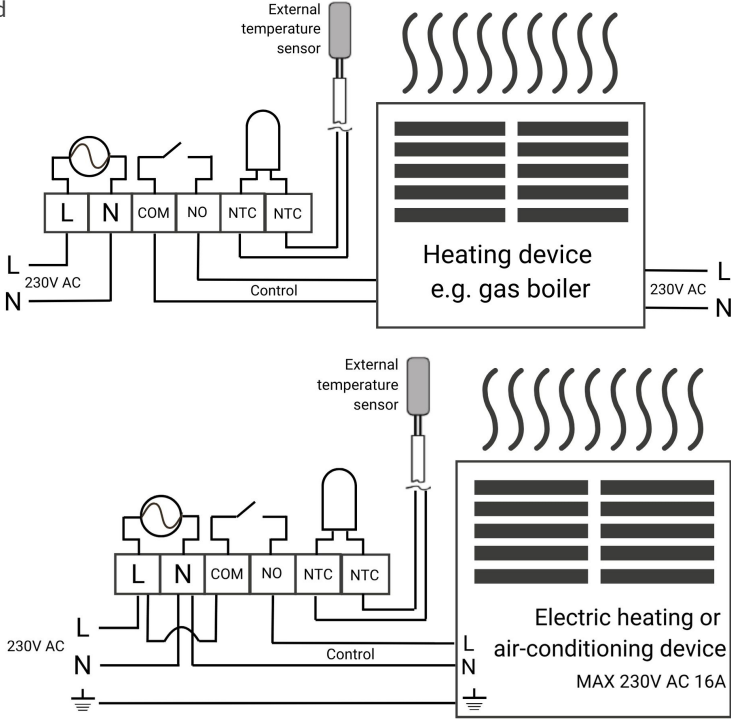

Fits standard Ø60 flush-mounted electrical boxes
- 

Weather information, air quality, and humidity data

TECHNICAL DATA

Power supply	90-240 V AC / 50-60 Hz / 1 W
Operating temperature range	0-90°C
Working cycle	weekly programmable
Working status signalling	LCD display - type IPS (colour)
Relay load capacity	Max. 250 V AC, max. 16 A
Number of temperature levels	8
Minimum / maximum temperature	1 - 10°C / 20 - 70°C
Temperature control range	1 - 70°C
Hysteresis	0,5°C - 2,5°C
Ingress protection	IP20
Humidity	≤85% non-condensing
Colour	black
WiFi	Tuya Smart, Smart Life
