AURATON

FENIX

Weekly Wired Thermostat

A simple weekly, wired temperature controller that allows temperature settings with hourly precision. The AURATON Fenix enables users to manage 7 independently configurable programs with independently adjustable temperature settings – daytime, nighttime, and anti-freeze.

The AURATON Fenix is the perfect solution for those looking for a more affordable alternative for home control – functionality at an attractive price!

Hourly precision temperature setting

10 temperature programmes (7 user-modifiable)

The FrostGuard function prevents the room from freezing

3 independently settable temperatures (day, night, anti-freeze)

Manual mode - 24hrs

LCD display adapted to work in dimly lit rooms

TECHNICAL DATA

Power supply	2xAA (2x1.5V), alkaline
Operating temperature range	0° – 45°C
Working cycle	weekly programmable
Working status signalling	LCD display
Relay load capacity	max. 250V AC, max. 8A
Number of temperature levels	3
Anti-freeze temperature	7°C
Temperature control range	5 – 30°C
Hysteresis	±0.2°C / ±0.4°C
Ingress protection	IP 20
Humidity	≤85% non-condensing
